Abstracts

According to our (Global Info Research) latest study, the global Aluminum Content ?99.0% Pure Aluminum Welding Wire market size was valued at US$ 167 million in 2025 and is forecast to a readjusted size of US$ 244 million by 2032 with a CAGR of 5.5% during review period.

Aluminum Content ?99.0% Pure Aluminum Welding Wire is a solid filler metal—based on industrial pure aluminum with an aluminum content typically no less than 99.0%—designed for Metal Inert Gas (MIG/GMAW) or Tungsten Inert Gas (TIG/GTAW) welding. Representative grades include AWS A5.10 ER1100/R1100, ISO 18273 S Al 1070, as well as products such as Al99.0, Al99.5, Al99.7, and Al99.8. Among these, ER1100 (with a typical aluminum content of approximately 99.0%) offers high ductility, excellent electrical and thermal conductivity, and superior corrosion resistance, though weld strength is relatively limited; it is primarily used for welding pure aluminum and similar base metals (such as the 1050, 1060, 1070, 1080, 1100, 1200, 1350, and 3003 series) in applications ranging from electrical conductors and busbars, chemical piping and storage tanks, food processing equipment, heat exchangers, and HVAC systems to aluminum containers, architectural trim, furniture, sheet metal and spun products, automotive radiators, non-structural aluminum components for rail transport, and general maintenance and manufacturing. The upstream supply chain primarily comprises primary aluminum and recycled high-purity aluminum, 1000-series aluminum rods and wire blanks, minor alloying additives (such as copper), wire-drawing lubricants, molds, spools (plastic or metal), and packaging materials. The midstream process involves aluminum ingot melting and composition control, continuous casting and rolling, rough and fine wire drawing, annealing, shaving and cleaning, straightness and surface quality control, precision layer winding or cutting, testing of chemical

composition and wire-feeding performance, and moisture-proof packaging. Finally, the downstream sector distributes products through welding material dealers and industrial gas/welding equipment channels to end-users in industries such as electric power, chemicals, food machinery, HVAC and refrigeration, architectural decoration, transportation, and maintenance and manufacturing.
