Aluminum Curbing is a road edge protection facility made of aluminum alloy material, usually used in the border design of roads, parking lots, gardens and landscape areas. Aluminum Curbing has become a substitute for traditional concrete and stone curbs due to its excellent corrosion resistance, light weight, high strength and good plasticity. It has the characteristics of anti-oxidation, strong weather resistance, not easy to rust, and easy construction, and is widely used in modern urban infrastructure construction. The design of aluminum alloy curb can effectively divide the lane and sidewalk, flower bed and lawn, etc., keep the road clean, improve safety, and enhance visual beauty.
