Aluminum entrance doors are residential entrance doors made primarily of aluminum alloy profiles, assembled, filled, and surface-treated. They are lightweight, corrosion-resistant, deformation-resistant, moisture-proof, fire-resistant, and have a modern appearance, making them widely used in residential, apartment, and commercial building entrances.

Upstream industries mainly include raw materials such as aluminum alloy profiles, aluminum sheets, hardware accessories, locks, surface coating materials, and glass. Downstream applications are concentrated in real estate residential projects, old house renovations, the pre-furnished housing market, and building materials and home decoration retail and engineering channels.

The global average price of an aluminum entrance door is US\$387 per unit, with annual sales of approximately 79.5 million units and global annual production capacity of approximately 82 million units. The industry profit margin is 20%.
