Aluminum plug laser welding machine is a kind of equipment specially used for welding aluminum bottle plugs or aluminum plug materials, which uses laser technology to achieve high-precision welding operation. By focusing a high-power laser beam on the surface of the aluminum material, the material is locally heated to the melting point and precision welding is achieved, which has the advantages of small heat-affected zone, fast welding speed and high welding quality. This equipment is widely used in aluminum plug packaging in the pharmaceutical, cosmetics, food and other industries, especially suitable for bottle mouth sealing processes with high requirements for sealing and appearance, to ensure the sealing and safety of the product.
