Global key players of aluminum powder include Kymera International, Toyal Group, U.S. Metal Powders, etc. The top three players hold a share about 36%. China is the largest producer, has a share about 40%, followed by Europe and Japan, with share 27% and 6%, respectively. The largest market is China, with a share about 35%, followed by Europe and North America, with share 27% and 13%, separately.

Aluminium Powder market, Aluminium powder is powdered aluminium. This was originally produced by mechanical means using a stamp mill to create flakes. Subsequently, a process of spraying molten aluminium to create a powder of droplets was developed by E. J. Hall in the 1920s. The resulting powder might then be processed further in a ball mill to flatten it into flakes for use as a coating or pigment. Aluminium powder is non-toxic and is not harmful unless injected directly in a major blood vessel such as the aorta Aluminium powder, if breathed in, is not particularly harmful and will only cause minor irritation. The melting point of aluminum powder is 660 °C.

This report studies the global Aluminum Powder production, demand, key manufacturers, and key regions.
