Aluminum Rivet Nut is a type of fastener made from aluminum alloy, used to create strong threaded connections on thin-walled materials. Aluminum rivet nuts are lightweight and easy to process, making them suitable for applications requiring reduced weight and corrosion resistance. During installation, aluminum rivet nuts are fixed in pre-drilled holes through pressing or riveting to provide a secure threaded interface. Their good thermal conductivity and oxidation resistance make them widely used in aerospace, automotive, and electronic devices.

The demand for aluminum rivet nuts is driven by trends towards lightweight and high-performance materials. As manufacturing industries seek to reduce product weight and improve fuel efficiency, the use of aluminum rivet nuts is expanding. Manufacturers are developing higher-strength and more durable aluminum alloys to enhance the performance of aluminum rivet nuts. Additionally, with increasing focus on environmental sustainability, the recyclability and sustainability of aluminum rivet nuts are being emphasized, leading to research and application of eco-friendly materials and production processes.
