Abstracts

Application portfolio management software allows administrative users to unify on-premises and SaaS applications to eliminate redundant systems and improve organization and efficiency. These tools provide a console for mapping an organization's application landscape. The software helps users standardize technologies, rationalize use cases, and align service level agreements. They integrate with data from the applications in use to help IT managers identify an application's value, reduce technology overlap, and mitigate risks. The tools present the landscape in a workflow or mapping model, which allows users to group technologies by use or department and visualize their entire company's software and service stack.

According to our (Global Info Research) latest study, the global Application Portfolio Management Software market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

This report is a detailed and comprehensive analysis for global Application Portfolio Management Software market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2023, are provided.

Key Features:

Global Application Portfolio Management Software market size and forecasts, in consumption value (\$ Million), 2018-2029

Global Application Portfolio Management Software market size and forecasts by region and country, in consumption value (\$ Million), 2018-2029

Global Application Portfolio Management Software market size and forecasts, by Type and by Application, in consumption value (\$ Million), 2018-2029

Global Application Portfolio Management Software market shares of main players, in revenue (\$ Million), 2018-2023

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Application Portfolio Management Software

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Application Portfolio Management Software market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include LeanIX, CAST, SecurityScorecard, Planview and Ardoq, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals, COVID-19 and Russia-Ukraine War Influence.

Market segmentation

Application Portfolio Management Software market is split by Type and by Application. For the period 2018-2029, the growth among segments provide accurate calculations and forecasts for consumption value by Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.
