Abstracts

The global Amino Acid Surfactants for Cosmetics market size is expected to reach \$ 1038.8 million by 2029, rising at a market growth of 7.3% CAGR during the forecast period (2023-2029).

Global key players of Amino Acid Surfactants for Cosmetics include Ajinomoto, Sino Lion, Changsha Puji, Tinci, Croda, etc. The top five players hold a share about 50%. Asia-Pacific is the largest market, has a share about 68%, followed by Europe, and North America, with share 14% and 13%, separately. In terms of product type, Glycine Based Surfactant is the largest segment, occupied for a share of 33%, and in terms of application, Facial Cleaner has a share about 44%.

Surfactants are chemical products consumed in large quantities every day on a worldwide scale. The development of less irritant, less toxic, consumer-friendly surfactants is, therefore, of general interest. Amino-acid-based surfactants constitute a novel class of surfactants produced from renewable raw materials and can be seen as an alternative to conventional surfactants.

In the report, we cover amino acid surfactants data by actual data instead of concentration conversion. Since amino acid surfactants have too many product forms and types, it may not be appropriate to convert by 30% solution or 100% active ingredient. Most amino acid surfactants solution has an active ingredient of 30-50%, and solid amino acid surfactants typically have an active ingredient of over 95%.

This report studies the global Amino Acid Surfactants for Cosmetics production, demand, key manufacturers, and key regions.
