Abstracts

The global Amino Acid Surfactants market size is expected to reach \$ 541 million by 2032, rising at a market growth of 4.7% CAGR during the forecast period (2026-2032). Amino Acid Surfactants are surfactants derived from natural amino acids, characterized by good biodegradability, low irritation, and environmental friendliness. They effectively reduce interfacial tension, enhance emulsification, dispersion, and wetting performance, while demonstrating excellent mildness and safety in cosmetics, personal care products, cleaning formulations, and industrial applications. Due to their renewable raw materials and low environmental and skin impact, amino acid surfactants are widely regarded as a green alternative to conventional surfactants. In 2025, global Amino Acid Surfactants sales reached approximately 153,223 Tons, with an average price of 2,545 US\$/Tons.

The growth of the amino acid surfactants market is driven by multiple factors. On one hand, the increasing consumer demand for green, low-irritation, and biodegradable chemicals is pushing personal care and household cleaning products toward amino acid surfactants. On the other hand, strengthening environmental regulations and sustainability standards worldwide encourage companies to adopt natural raw materials and eco-friendly formulations. Additionally, the rapid expansion of cosmetics, baby care products, and functional cleaning agents provides a stable market foundation for amino acid surfactants.

This report studies the global Amino Acid Surfactants production, demand, key manufacturers, and key regions.
