Abstracts

According to our (Global Info Research) latest study, the global Ammonia Filling Equipment market size was valued at US\$ 198 million in 2025 and is forecast to a readjusted size of US\$ 295 million by 2032 with a CAGR of 5.9% during review period.

In 2025, global production of ammonia filling equipment reached 13,000 units, with an estimated average selling price of US\$14,820 per unit. Ammonia filling equipment is an automatic refrigerant filling system for industrial refrigeration, central air conditioning, chiller units, heat pumps, freezers, ice makers, and refrigeration equipment production lines. 'Ammonia' primarily refers to R717 ammonia refrigerant/liquid ammonia refrigerant. The equipment typically integrates a vacuum pump, booster pump, refrigerant storage and supply unit, mass flow meter/weighing module, filling gun, recovery unit, PLC/touch screen, data traceability system, leak detection, explosion-proof electrical components, and safety interlocks. It is used to complete vacuuming, pressure holding/leak detection, dehydration verification, quantitative filling, residual gas recovery, and production line data recording during the refrigeration system's factory delivery or maintenance process. Its applications are mainly concentrated in cold storage, food cold chain, beer and beverage, chemical process cooling, pharmaceutical cooling, data center cooling, central air conditioning, commercial air conditioning, heat pump water heaters, air source heat pumps, chiller units, ice-making equipment, and the manufacturing of freezers and refrigerators. The upstream of the industry chain includes vacuum pumps, booster pumps, refrigerant pumps, compressors, flow meters, weighing sensors, valves and fittings, filling guns, pressure/temperature sensors, leak detectors, explosion-proof electrical equipment, PLCs, servo controls, industrial software, and machine frame sheet metal. The midstream consists of companies producing refrigerant filling, recovery, leak detection, and production line automation

equipment. The downstream comprises manufacturers of air conditioners, heat pumps, industrial refrigeration units, freezers, ice makers, water chillers, and cold chain equipment. Gross profit margins range from approximately 20% to 40%.
