Abstracts

An amorphous a-olefin copolymer, commonly referred to as APAO (Amorphous polyalpha olefin), is a random copolymer obtained by polymerization of a-olefins and belongs to a plastomer material.

Scope of the Report:

This report focuses on the Amorphous Polyalphaolefin in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Because of its low molecular weight and high degree of randomness, APAO can exhibit different properties of isotactic polyolefins and can be applied to different applications. APAO's aliases are: amorphous polyolefins, also known in some regions as APOs, amorphous polyalphaolefins, or APP resins.

This product has been widely used in asphalt modification, hot melt and pressure sensitive adhesives, sealing materials due to its excellent low temperature, high temperature performance, water resistance, anti-oxidation and UV resistance, and good miscibility with organic phase. Waterproof materials, plastic masterbatches, car mats, tile carpets, packaging, cable filling, paper coating and other fields.

The worldwide market for Amorphous Polyalphaolefin is expected to grow at a CAGR of roughly 6.0% over the next five years, will reach 510 million US\$ in 2023, from 360 million US\$ in 2017, according to a new GIR (Global Info Research) study.
