Amorphous Polyethylene Terephthalate (APET) is an amorphous polyester plastic made by reacting terephthalic acid and ethylene glycol. APET is usually used to make various transparent or translucent plastic products, such as food packaging, thermoformed containers, cosmetic bottles, industrial parts, etc. It is widely used in many applications due to its high strength and stiffness, excellent chemical resistance and good thermal insulation properties. In addition, APET can be recycled, so it is considered an environmentally friendly material.
