Abstracts

The global AMR Top Modules market size is expected to reach \$ 473 million by 2032, rising at a market growth of 16.8% CAGR during the forecast period (2026-2032).

In 2025, global AMR Top Modules production reached approximately 34,000 units. AMR Top Modules refer to independently marketed modular units and related equipment specifically designed to be mounted on autonomous mobile robots (AMRs), integrated with AMR platforms, or operated in coordination with AMR platforms, enabling functions such as conveying, lifting, cart handling, pallet transfer, and pick-and-place operations. This category excludes integrated AMRs in which handling, conveying, lifting, or similar functions are built into the robot as non-separable features.

The AMR Top Modules market should be viewed as a derived segment of the broader expansion of mobile robotics in intralogistics and warehouse automation. Recent industry data still point to strong momentum: according to the IFR World Robotics 2025 ? Service Robots report, around 102,900 robots for transportation and logistics tasks were sold worldwide in 2024, while about 81,800 mobile robots for intralogistics applications were sold in the same year. In parallel, the 2025 MHI?Deloitte Annual Industry Report indicates that supply chain investment appetite remains strong, with 55% of respondents increasing investment in supply chain technology and innovation and 60% planning to invest more than US\$1 million. Against this backdrop, AMR top modules and related equipment are becoming increasingly relevant because they represent the layer that converts a mobile platform into a task-specific automation solution.

1. Industry Outlook

The AMR Top Modules market is expected to benefit from the continued expansion of AMRs in intralogistics, warehouse automation, and material-handling applications. As AMRs increasingly evolve into platform-based products, independently sold modules and related equipment are becoming more important as enablers of task-specific automation.

2. Key Growth Drivers

First, AMRs are increasingly being deployed not as single-function vehicles, but as configurable platforms that must be adapted to different workflows such as conveying, lifting, cart handling, pallet transfer, and pick-and-place operations. Second, demand is supported by the broader expansion of warehouse automation and digital supply chain investment, which continues to encourage modular and scalable solutions. Third, there is growing evidence that mobile automation is also gaining relevance in controlled environments. For example, SEMI's 2024 public report notes that AGVs and AMRs are under evaluation at many back-end assembly plants, while SEMI 2025 exhibitor materials from suppliers such as Fabmatics and Youibot explicitly position AMRs for semiconductor cleanrooms and material transport in high-cleanliness environments. This suggests that the addressable logic of the market may gradually extend beyond general warehouse logistics into cleaner and more process-sensitive applications.

3. Market Positioning

AMR Top Modules should be viewed as a midstream functional-extension market rather than a simple accessory market. These products are typically positioned between the AMR base and low-value accessories, and their value lies in converting a mobile robot platform into a workflow-specific automation solution.

4. Estimation Logic

In general, market size should be assessed based on the applicable AMR platform base, the proportion of AMRs adopting independently sold modules or related equipment, the value contribution of such modules relative to the AMR base, and replacement, upgrade, or reconfiguration demand over time.

5. Scope Definition

This report focuses on independently marketed modular units and related equipment designed to be mounted on AMRs, integrated with AMR platforms, or operated in

coordination with AMR platforms. Integrated AMRs with non-separable built-in handling, conveying, or lifting functions are excluded.

6. Classification Framework

From the product perspective, the market is further divided into three dimensions. First, by Function Type, including Convey Modules, Lift Modules, Cart Modules, Pallet Handling Modules, and Others. Second, by Adaptation Type, including Catalog Modules, Configurable Modules, and Project-based Custom Modules. Third, by Mounting Position, including Top-mounted Modules and Off-board Interface/Physical Link Modules. This classification framework is intended to reflect the product logic of the market more accurately and to distinguish core top modules from related supporting equipment.

This report studies the global AMR Top Modules production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for AMR Top Modules and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of AMR Top Modules that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global AMR Top Modules total production and demand, 2021-2032, (Units)

Global AMR Top Modules total production value, 2021-2032, (USD Million)

Global AMR Top Modules production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (Units), (based on production site)

Global AMR Top Modules consumption by region & country, CAGR, 2021-2032 & (Units)

U.S. VS China: AMR Top Modules domestic production, consumption, key domestic manufacturers and share

Global AMR Top Modules production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (Units)

Global AMR Top Modules production by Function Type, production, value, CAGR, 2021-2032, (USD Million) & (Units)

Global AMR Top Modules production by Application, production, value, CAGR, 2021-2032, (USD Million) & (Units)

This report profiles key players in the global AMR Top Modules market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include ABB Asea Brown Boveri Ltd (CH), OMRON Corporation (JP), MiR A/S (DK), ROEQ (DK), Nord Modules A/S (DK), Dimalog Oy (FI), Interroll (CH), TruPhysics (DE), Direct Conveyors LLC (US), Guidance Automation Ltd (UK), etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World AMR Top Modules market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (Units) and average price (US\$/Unit) by manufacturer, by Function Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

5.3 Market Segment by Function Type

5.3.1 World AMR Top Modules Production by Function Type (2021-2032)

5.3.2 World AMR Top Modules Production Value by Function Type (2021-2032)

5.3.3 World AMR Top Modules Average Price by Function Type (2021-2032)

6 MARKET ANALYSIS BY ADAPTATION TYPE

6.1 World AMR Top Modules Market Size Overview by Adaptation Type: 2021 VS 2025 VS 2032

6.2 Segment Introduction by Adaptation Type

6.2.1 Catalog Module

6.2.2 Configurable Module

6.2.3 Project-based Custom Module

6.3 Market Segment by Adaptation Type

6.3.1 World AMR Top Modules Production by Adaptation Type (2021-2032)

6.3.2 World AMR Top Modules Production Value by Adaptation Type (2021-2032)

6.3.3 World AMR Top Modules Average Price by Adaptation Type (2021-2032)

7 MARKET ANALYSIS BY MOUNTING POSITION

7.1 World AMR Top Modules Market Size Overview by Mounting Position: 2021 VS 2025 VS 2032

7.2 Segment Introduction by Mounting Position

7.2.1 Top-mounted Module

7.2.2 Off-board Interface/physical Link Module

7.3 Market Segment by Mounting Position

7.3.1 World AMR Top Modules Production by Mounting Position (2021-2032)

7.3.2 World AMR Top Modules Production Value by Mounting Position (2021-2032)

7.3.3 World AMR Top Modules Average Price by Mounting Position (2021-2032)

8 MARKET ANALYSIS BY APPLICATION

8.1 World AMR Top Modules Market Size Overview by Application: 2021 VS 2025 VS 2032

8.2 Segment Introduction by Application

8.2.1 Warehousing

8.2.2 Intralogistics

8.2.3 Line-side Logistics

8.2.4 Cart/shelf Transport

8.2.5 Hospitals/clean Environments

8.2.6 Others

8.3 Market Segment by Application

8.3.1 World AMR Top Modules Production by Application (2021-2032)

8.3.2 World AMR Top Modules Production Value by Application (2021-2032)

8.3.3 World AMR Top Modules Average Price by Application (2021-2032)
