Abstracts

The global Anaerobic Wastewater Treatment System market size is expected to reach \$ 893 million by 2032, rising at a market growth of 8.0% CAGR during the forecast period (2026-2032).

In 2025, global Anaerobic Wastewater Treatment System production reached approximately 4,391 units, with an average global market price of around US\$ 120,750 per unit. Gross margin is about 22.6%. The cost is US\$ 93,400 per unit. The production capacity is about 5,000 units. An Anaerobic Wastewater Treatment System is a water treatment technology that uses anaerobic microorganisms to degrade organic pollutants in wastewater under oxygen-free conditions. It primarily removes high concentrations of COD, BOD, and organic matter while producing recoverable biogas as an energy source. The system typically includes an equalization tank, anaerobic reactor, water distribution system, three-phase separator, biogas collection unit, sludge recirculation system, and automatic control system. Common technologies include UASB, EGSB, IC reactors, and anaerobic membrane bioreactors. It is widely used in food and beverage, brewery, sugar, paper, chemical, pharmaceutical, livestock farming, and municipal wastewater sectors, offering advantages such as low energy consumption, reduced sludge production, and energy recovery.

Anaerobic wastewater treatment systems are expected to evolve toward higher efficiency, smarter automation, modularization, and enhanced energy recovery. As industrial wastewater becomes more concentrated and treatment demands increase, systems will be optimized for higher organic removal efficiency, greater biogas production, lower energy consumption, and reduced sludge generation. Automation, online monitoring, data analysis, and digital management will improve operational stability and controllability. Trends toward miniaturization, modularization, and system

integration will enhance deployment flexibility, lower investment costs, and expand application across food, pharmaceutical, chemical, livestock, and municipal wastewater sectors.
