Abstracts

According to our (Global Info Research) latest study, the global Analog Multiplexer IC market size was valued at US$ 1507 million in 2025 and is forecast to a readjusted size of US$ 2277 million by 2032 with a CAGR of 6.1% during review period.

Analog Multiplexer IC refers to a class of integrated circuits that use digitally controlled MOS switching elements to establish selectable and generally bidirectional signal paths between multiple analog channels and one or more common terminals. The research scope focuses on standalone devices supplied as analog multiplexers, demultiplexers or functionally equivalent analog switch arrays, covering SPST, SPDT, multi-SPDT, 4:1, 8:1, 16:1 and higher-channel-count configurations. Key product characteristics include supported signal and supply voltage ranges, channel topology, on-resistance and flatness, leakage current, charge injection, switching speed, bandwidth, crosstalk, off-isolation, logic compatibility, protection functions, package format and reliability qualification. Analog Multiplexer IC products are manufactured using CMOS, precision analog, high-voltage CMOS and specialized high-reliability processes, with selected products employing silicon-on-insulator technologies for high-temperature or radiation-intensive environments. Their principal function is to route multiple sensor, measurement, communication or interface signals through shared amplifiers, converters, processors, connectors or test resources while preserving signal integrity. Major applications include industrial data acquisition, test and measurement, automotive signal routing, consumer interfaces, medical imaging, communications equipment and aerospace electronics.

Key Findings

info@marketpublishers.com

Global Analog Multiplexer IC shipments were estimated at approximately 2.8 billion units in 2025

The blended 2025 average selling price was approximately USD 0.52 per unit

Industrial and test-and-measurement applications represented about 30% of estimated market value

General-purpose devices dominate unit volume while precision and high-voltage products contribute disproportionate value

Thirty verified parent-level suppliers form the global Core Formal List

Market Trends

The Analog Multiplexer IC market is evolving from basic channel selection and pin-compatible replacement toward higher signal integrity, stronger fault tolerance and broader system compatibility. Low-voltage digital control is increasingly required to coexist with wider analog signal ranges, particularly in mixed-voltage industrial, automotive and communications systems. Product development is therefore emphasizing lower and flatter on-resistance, reduced leakage and charge injection, improved off-isolation, wider bandwidth, power-off high-impedance behavior, injection-current control and smaller leadless packages. Automotive-qualified products are moving into safety-related controllers, telematics, infotainment and sensing architectures, while high-channel-count and high-voltage devices continue to develop for ultrasound imaging and nondestructive testing. At the highest reliability level, specialized SOI-based devices retain strategic importance in radiation-intensive and high-temperature environments. These developments are increasing the technical separation between commodity-compatible products and performance-oriented Analog Multiplexer IC portfolios, even as standard architectures remain highly price competitive.

Market Dynamics

Drivers

Demand growth is supported by the rising number of sensors, measurement nodes and monitored voltage rails in industrial automation, vehicles, energy systems and

+357 96 030922
info@marketpublishers.com

connected equipment. Analog Multiplexer IC products allow multiple channels to share comparatively expensive amplifiers, analog-to-digital converters and processing resources, helping reduce component count, board area and system cost. Automotive electronics provide an additional driver as battery monitoring, domain and zonal control, diagnostic systems and in-vehicle interfaces require reliable routing across mixed-voltage environments. Medical imaging also creates high-value demand because ultrasound platforms require multiple high-voltage transmit and low-level receive paths to be connected to arrays of piezoelectric transducers.

Restraints

Market expansion is constrained by functional integration and persistent price pressure in mature product categories. Input multiplexers are increasingly embedded within microcontrollers, data converters, sensor interfaces and configurable mixed-signal devices, reducing the need for a separate component in relatively simple systems. Standard 405x-compatible devices and basic SPDT switches also face extensive second-source competition, limiting pricing power and making manufacturing efficiency, package cost and distribution reach important commercial variables. In higher-performance applications, long qualification cycles and customers' reluctance to change an established signal-path component can slow adoption of new suppliers, even when alternative products offer attractive specifications or pricing.

Opportunities

The most attractive opportunities are concentrated in applications where greater precision, protection or channel density creates measurable system value. Vehicle electrification and increasingly distributed automotive electronics support demand for qualified products with power-off protection, injection-current control and low-voltage logic compatibility. Industrial edge systems and automated test platforms create opportunities for lower-leakage and higher-density devices that can route growing numbers of sensing and diagnostic channels. Medical ultrasound and nondestructive testing support specialized high-voltage arrays with 16, 32, 64 or more channels, while aerospace systems maintain demand for low-leakage and radiation-hardened architectures. Suppliers able to combine competitive cost with application-specific qualification and dependable long-term supply are positioned to access markets beyond basic replacement products.

Challenges

The principal challenge is balancing mutually conflicting electrical characteristics within commercially viable manufacturing and packaging costs. Lower on-resistance may increase capacitance, while wider voltage ranges, improved protection and lower leakage can require larger die area or specialized processes. Suppliers must also maintain signal integrity across temperature, voltage and manufacturing variation while meeting automotive, medical, industrial or aerospace qualification requirements. Commercially, established catalog leaders benefit from broad reference designs, global distribution and long customer relationships, whereas smaller suppliers must demonstrate consistent quality, supply continuity and parameter equivalence. The market also faces classification complexity because analog switches, digital bus switches, protocol-specific switches and integrated multiplexing functions can overlap in certain applications, making product positioning and market measurement more difficult.

Industry Chain Analysis

The upstream industry chain for Analog Multiplexer IC products comprises semiconductor-grade silicon wafers, specialty CMOS and high-voltage process platforms, photomasks, electronic design automation tools, analog and mixed-signal intellectual property, packaging materials and semiconductor manufacturing equipment. Depending on the product, fabrication may use mainstream CMOS for high-volume general-purpose devices, precision analog or high-voltage CMOS for industrial and medical products, and specialized SOI processes for radiation-hardened or high-temperature components. Wafer fabrication, assembly and electrical testing may be performed internally by integrated device manufacturers or through foundry and outsourced semiconductor assembly and test partners.

The midstream segment creates value through circuit architecture, device modeling, signal-integrity optimization, protection design, process selection, qualification, packaging and lifecycle management. General-purpose products derive competitiveness from scale, yield, package efficiency and distribution, while precision, medical and high-reliability devices derive a larger share of value from intellectual property, process control, testing and customer qualification. Downstream products are incorporated into data-acquisition boards, industrial controllers, automotive electronic control units, test instruments, medical imaging platforms, communication equipment and aerospace systems. Across the chain, profitability generally improves as products move from pin-compatible commodity functions toward precision, protected, high-

voltage and application-qualified solutions.

Segment Insights

By product positioning, general-purpose Analog Multiplexer IC products account for the largest share of unit shipments because standard SPDT, 4:1, 8:1 and 16:1 architectures are widely used across electronic equipment. Their revenue contribution is lower than their unit share because mature devices are available from multiple suppliers and are subject to sustained price competition. Precision low-leakage, low-on-resistance, fault-protected and high-voltage products represent smaller shipment volumes but contribute disproportionately to market value, reflecting higher design complexity, qualification requirements and average selling prices. High-channel-count ultrasound arrays and radiation-hardened products occupy particularly specialized positions, with limited volumes but substantially higher value per device.

By application, industrial data acquisition and test and measurement together account for approximately 30% of estimated market value and form the largest application group. Consumer electronics represent roughly one-fifth of demand and generate substantial unit volume through audio, USB and portable-interface switching, although this category is more exposed to integration and price erosion. Automotive applications contribute a high-teens share and present stronger value-growth potential because of reliability, protection and qualification requirements. Medical applications account for about one-tenth of estimated value, supported by specialized high-voltage ultrasound products, while communications, computing, aerospace and other applications form the remaining demand base.

Downstream Market Opportunities

Downstream opportunities are increasingly linked to systems that must connect more sensing and diagnostic channels without expanding the number of high-cost converters or processors. Industrial equipment is adding condition monitoring, predictive maintenance and distributed measurement functions, increasing the need for accurate signal routing with low leakage and stable on-resistance. Automotive platforms require more voltage monitoring, sensor aggregation and fault isolation as electrical architectures become more distributed. Medical ultrasound systems offer a differentiated opportunity through higher transducer counts and more compact front-end designs, while aerospace and defense systems require long product lifecycles and high-reliability components. Consumer interfaces remain important for unit demand, but the

strongest commercial opportunities are likely to arise where Analog Multiplexer IC performance directly affects measurement accuracy, safety, system availability or equipment size.

Regional Insights

Asia-Pacific represents the largest Analog Multiplexer IC market by unit demand and semiconductor manufacturing activity, supported by the concentration of consumer electronics, communications equipment, automotive electronics and industrial hardware production. China is also one of the most active markets for supplier expansion, with domestic analog semiconductor companies extending from basic compatible devices into lower-leakage, higher-voltage and automotive-qualified products. Japan maintains established capabilities in automotive, industrial and specialized analog components, while Taiwan is characterized by fabless suppliers focused on portable and consumer-interface applications. South Korea and Southeast Asia contribute substantial electronics production and packaging activity, although the number of headquarters-based independent Analog Multiplexer IC suppliers remains comparatively limited.

North America represents the leading region for high-value precision, medical, test-and-measurement and aerospace applications, supported by a concentration of diversified analog semiconductor groups and specialized high-reliability suppliers. Europe has a strong position in automotive and industrial electronics and benefits from established mixed-signal manufacturing capabilities. Regional competition is increasingly influenced by supply-chain localization, lifecycle assurance and customer preference for multiple qualified sources. As a result, regional suppliers can gain share in standardized products, while the highest-performance categories remain more dependent on long process experience, application support and qualification records.

Competitive Landscape Analysis

The Analog Multiplexer IC market has a moderately concentrated value structure combined with a substantially broader supplier base in standardized products. Texas Instruments and Analog Devices anchor the broadest global portfolios, supported by extensive voltage, topology, precision and protection coverage as well as global engineering and distribution networks. NXP, STMicroelectronics, ON Semiconductor, Renesas, Nexperia, Diodes and Vishay form a diversified group with strengths in automotive, industrial, standard-logic-compatible and portable-interface products.

Microchip Technology, Monolithic Power Systems and MINEBEA MITSUMI through ABLIC are differentiated in high-voltage ultrasound switching, while Honeywell and Holt Integrated Circuits address aerospace, high-temperature or radiation-hardened requirements. Chinese and Taiwanese suppliers are increasing competition in general-purpose, low-voltage and consumer-interface products, with selected companies moving toward precision and automotive-qualified portfolios. The verified Core Formal List contains 30 parent-level supplier entities after consolidating subsidiaries and acquired brands. Competitive advantage increasingly depends on a combination of electrical performance, process reliability, application qualification, supply continuity, catalog breadth and customer support rather than product price alone.

Report Scope

This report is a detailed and comprehensive analysis for global Analog Multiplexer IC market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Analog Multiplexer IC market size and forecasts, in consumption value ($ Million), sales quantity (Million Units), and average selling prices (US$/Unit), 2021-2032

Global Analog Multiplexer IC market size and forecasts by region and country, in consumption value ($ Million), sales quantity (Million Units), and average selling prices (US$/Unit), 2021-2032

Global Analog Multiplexer IC market size and forecasts, by Type and by Application, in consumption value ($ Million), sales quantity (Million Units), and average selling prices (US$/Unit), 2021-2032

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Analog Multiplexer IC

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Analog Multiplexer IC market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Texas Instruments Incorporated, Analog Devices, Inc., NXP Semiconductors N.V., STMicroelectronics N.V., ON Semiconductor Corporation, Renesas Electronics Corporation, Toshiba Corporation, Microchip Technology Incorporated, Nexperia B.V., Monolithic Power Systems, Inc., etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Analog Multiplexer IC market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

3 COMPETITIVE ENVIRONMENT: ANALOG MULTIPLEXER IC BY MANUFACTURER

3.1 Global Analog Multiplexer IC Sales Quantity by Manufacturer (2021-2026)
3.2 Global Analog Multiplexer IC Revenue by Manufacturer (2021-2026)
3.3 Global Analog Multiplexer IC Average Price by Manufacturer (2021-2026)
3.4 Market Share Analysis (2025)
  3.4.1 Producer Shipments of Analog Multiplexer IC by Manufacturer Revenue ($MM) and Market Share (%): 2025
  3.4.2 Top 3 Analog Multiplexer IC Manufacturer Market Share in 2025
  3.4.3 Top 6 Analog Multiplexer IC Manufacturer Market Share in 2025
3.5 Analog Multiplexer IC Market: Overall Company Footprint Analysis
  3.5.1 Analog Multiplexer IC Market: Region Footprint
  3.5.2 Analog Multiplexer IC Market: Company Product Type Footprint
  3.5.3 Analog Multiplexer IC Market: Company Product Application Footprint
3.6 New Market Entrants and Barriers to Market Entry
3.7 Mergers, Acquisition, Agreements, and Collaborations

4 CONSUMPTION ANALYSIS BY REGION

4.1 Global Analog Multiplexer IC Market Size by Region
  4.1.1 Global Analog Multiplexer IC Sales Quantity by Region (2021-2032)
  4.1.2 Global Analog Multiplexer IC Consumption Value by Region (2021-2032)
  4.1.3 Global Analog Multiplexer IC Average Price by Region (2021-2032)
4.2 North America Analog Multiplexer IC Consumption Value (2021-2032)
4.3 Europe Analog Multiplexer IC Consumption Value (2021-2032)
4.4 Asia-Pacific Analog Multiplexer IC Consumption Value (2021-2032)
4.5 South America Analog Multiplexer IC Consumption Value (2021-2032)
4.6 Middle East & Africa Analog Multiplexer IC Consumption Value (2021-2032)

5 MARKET SEGMENT BY TYPE

5.1 Global Analog Multiplexer IC Sales Quantity by Type (2021-2032)
5.2 Global Analog Multiplexer IC Consumption Value by Type (2021-2032)
5.3 Global Analog Multiplexer IC Average Price by Type (2021-2032)

6 MARKET SEGMENT BY APPLICATION

6.1 Global Analog Multiplexer IC Sales Quantity by Application (2021-2032)
6.2 Global Analog Multiplexer IC Consumption Value by Application (2021-2032)
6.3 Global Analog Multiplexer IC Average Price by Application (2021-2032)

7 NORTH AMERICA

7.1 North America Analog Multiplexer IC Sales Quantity by Type (2021-2032)
7.2 North America Analog Multiplexer IC Sales Quantity by Application (2021-2032)
7.3 North America Analog Multiplexer IC Market Size by Country
  7.3.1 North America Analog Multiplexer IC Sales Quantity by Country (2021-2032)
  7.3.2 North America Analog Multiplexer IC Consumption Value by Country (2021-2032)
  7.3.3 United States Market Size and Forecast (2021-2032)
  7.3.4 Canada Market Size and Forecast (2021-2032)
  7.3.5 Mexico Market Size and Forecast (2021-2032)

8 EUROPE

8.1 Europe Analog Multiplexer IC Sales Quantity by Type (2021-2032)
8.2 Europe Analog Multiplexer IC Sales Quantity by Application (2021-2032)
8.3 Europe Analog Multiplexer IC Market Size by Country
  8.3.1 Europe Analog Multiplexer IC Sales Quantity by Country (2021-2032)
  8.3.2 Europe Analog Multiplexer IC Consumption Value by Country (2021-2032)
  8.3.3 Germany Market Size and Forecast (2021-2032)
  8.3.4 France Market Size and Forecast (2021-2032)
  8.3.5 United Kingdom Market Size and Forecast (2021-2032)
  8.3.6 Russia Market Size and Forecast (2021-2032)
  8.3.7 Italy Market Size and Forecast (2021-2032)

9 ASIA-PACIFIC

9.1 Asia-Pacific Analog Multiplexer IC Sales Quantity by Type (2021-2032)
9.2 Asia-Pacific Analog Multiplexer IC Sales Quantity by Application (2021-2032)
9.3 Asia-Pacific Analog Multiplexer IC Market Size by Region
  9.3.1 Asia-Pacific Analog Multiplexer IC Sales Quantity by Region (2021-2032)
  9.3.2 Asia-Pacific Analog Multiplexer IC Consumption Value by Region (2021-2032)
  9.3.3 China Market Size and Forecast (2021-2032)
  9.3.4 Japan Market Size and Forecast (2021-2032)

9.3.7 Southeast Asia Market Size and Forecast (2021-2032)
9.3.8 Australia Market Size and Forecast (2021-2032)

10 SOUTH AMERICA

10.1 South America Analog Multiplexer IC Sales Quantity by Type (2021-2032)
10.2 South America Analog Multiplexer IC Sales Quantity by Application (2021-2032)
10.3 South America Analog Multiplexer IC Market Size by Country
10.3.1 South America Analog Multiplexer IC Sales Quantity by Country (2021-2032)
10.3.2 South America Analog Multiplexer IC Consumption Value by Country (2021-2032)
10.3.3 Brazil Market Size and Forecast (2021-2032)
10.3.4 Argentina Market Size and Forecast (2021-2032)

11 MIDDLE EAST & AFRICA

11.1 Middle East & Africa Analog Multiplexer IC Sales Quantity by Type (2021-2032)
11.2 Middle East & Africa Analog Multiplexer IC Sales Quantity by Application (2021-2032)
11.3 Middle East & Africa Analog Multiplexer IC Market Size by Country
11.3.1 Middle East & Africa Analog Multiplexer IC Sales Quantity by Country (2021-2032)
11.3.2 Middle East & Africa Analog Multiplexer IC Consumption Value by Country (2021-2032)
11.3.3 Turkey Market Size and Forecast (2021-2032)
11.3.4 Egypt Market Size and Forecast (2021-2032)
11.3.5 Saudi Arabia Market Size and Forecast (2021-2032)
11.3.6 South Africa Market Size and Forecast (2021-2032)

12 MARKET DYNAMICS

12.1 Analog Multiplexer IC Market Drivers
12.2 Analog Multiplexer IC Market Restraints
12.3 Analog Multiplexer IC Trends Analysis
12.4 Porters Five Forces Analysis
12.4.1 Threat of New Entrants
12.4.2 Bargaining Power of Suppliers

13 RAW MATERIAL AND INDUSTRY CHAIN

13.1 Raw Material of Analog Multiplexer IC and Key Manufacturers
13.2 Manufacturing Costs Percentage of Analog Multiplexer IC
13.3 Analog Multiplexer IC Production Process
13.4 Industry Value Chain Analysis

14 SHIPMENTS BY DISTRIBUTION CHANNEL

14.1 Sales Channel
14.1.1 Direct to End-User
14.1.2 Distributors
14.2 Analog Multiplexer IC Typical Distributors
14.3 Analog Multiplexer IC Typical Customers
