The global Analog Walkie-talkie market size is expected to reach \$ 4379 million by 2032, rising at a market growth of 3.9% CAGR during the forecast period (2026-2032).

An analog walkie-talkie is an analog walkie-talkie (also known as a traditional walkie-talkie) designed with analog communication technology, which modulates the stored signal to the transmission frequency of the walkie-talkie. In 2025, global Analog Walkie-talkie production reached approximately 108 million units, with an average global market price of around 30 US\$/Unit. The production capacity of Analog Walkie-talkie reaches 135 million units, and the industry's gross profit margin is approximately between 30% and 50%.

Analog walkie-talkies maintain stable market demand, primarily driven by multiple factors including the continued reliance of small and medium-sized enterprises on low-cost and reliable communication tools, the extensive existing infrastructure of analog systems, the advantages of simple operation requiring no complex training, and the priority consideration of equipment stability and battery life in remote areas or emergency scenarios. Meanwhile, in some developing countries and specific industries, analog two-way radios remain the preferred economical and practical communication solution due to their high compatibility and ease of maintenance.

This report studies the global Analog Walkie-talkie production, demand, key manufacturers, and key regions.
