Abstracts

A particle counter is a sophisticated monitoring instrument that counts the amount of particulate contamination. It can be used to detect contaminants from the air, a surface or a liquid. Some examples of these particles can be anything from oil, metal shavings, dust, smoke, ash, mold, or other biological contaminants.

Scope of the Report:

This report focuses on the Analyzer for Particle Counters in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. As an important and necessary instrument for the maintenance of cleanroom, achievement of ultra-pure water or ultra-pure oil for some specific R&D or production requirements, the demand of particle counters is growing year by year. In 2011, the global sales volume of particle counter was about 22.6 thousand units. By the end of 2015, the sales volume of particle counter worldwide reached about 25.6 thousand units, which brought in with industry revenue about 190 million USD.

Currently, there are more than 30 manufacturers of particle counters worldwide. But the market is still concentrated, as the technology of particle counters is hold by not many enterprises. In fact, the top five manufacturers, such as Particle Measuring Systems, Lighthouse Worldwide Solutions, Rion, HCT Instruments and Beckman Coulter accounts for 60% of the industry total revenue.

Europe, USA and Japan have been the market developers of particle counters for years; and the market in the three regions still hold the majority market share of particle counters. But market in developing countries is developing fast, and market in these regions is regarded as the development engine for the future market of particle

counters.

The worldwide market for Analyzer for Particle Counters is expected to grow at a CAGR of roughly 2.0% over the next five years, will reach 220 million US\$ in 2023, from 200 million US\$ in 2017, according to a new GIR (Global Info Research) study.
