Abstracts

According to our (Global Info Research) latest study, the global Android POS market size was valued at US\$ 3713 million in 2025 and is forecast to a readjusted size of US\$ 5514 million by 2032 with a CAGR of 5.9% during review period.

Android POS can link itself to several checkout terminals in your counter and operated by main computer. With the Android technologies added, the device is programmed, it can track your usage, record sales, monitor updates of dollar changes, calculate orders and payments, and tally inventory sales based on items saved in your system. This POS system gives you control on your business where security control on the cash register have and limit the number of employees who can open this. The Android POS is capable of keeping tracks and records of's sales. Checking the business's profit is much easier compared to tedious manual checking. It can help to improve marketing strategies and technique by analyzing the condition of the business. That's why even small-scale businesses need the help of such device to make their job a lot easier and faster.

In 2024, global Android POS sales volume reached approximately 60.5 million units, with an average global market price of around 58 US\$ per unit.

Retailers, restaurants, and service providers are increasingly moving away from traditional stationary POS terminals in favor of mobile, cloud-enabled solutions. Android POS systems support cloud connectivity, allowing businesses to access real-time sales data, inventory management, and analytics remotely. This flexibility is particularly attractive to small and medium-sized enterprises (SMEs) seeking cost-effective, scalable solutions.

Android POS systems are generally more affordable than proprietary POS hardware, due to the widespread availability of Android devices and open-source software support. Lower hardware and software costs make Android POS devices accessible to a wide range of businesses, from startups to established retail chains, driving market adoption.

The global proliferation of Android smartphones and tablets has made the operating system a natural choice for POS systems. Businesses can leverage familiar devices for transaction processing, mobile checkout, and customer engagement, reducing training time and improving operational efficiency. The high availability of Android-compatible peripherals such as barcode scanners, receipt printers, and payment modules further supports adoption.

Modern retailers are adopting omnichannel strategies, integrating online and offline sales channels to improve customer experience. Android POS systems enable seamless inventory tracking, loyalty program integration, digital receipts, and mobile payments, facilitating unified retail operations. The need for real-time sales data and synchronized inventory management is driving businesses to implement Android POS solutions.

The rise of digital and contactless payments is a key market driver. Android POS systems support mobile wallets, NFC payments, QR code scanning, and EMV card processing, meeting the growing consumer demand for convenient and secure payment options. Integration with digital payment solutions enhances transaction speed and customer satisfaction, further boosting adoption.

This report is a detailed and comprehensive analysis for global Android POS market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Android POS market size and forecasts, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (USD/Unit), 2021-2032

Global Android POS market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (USD/Unit), 2021-2032

Global Android POS market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (USD/Unit), 2021-2032

Global Android POS market shares of main players, shipments in revenue (\$ Million), sales quantity (K Units), and ASP (USD/Unit), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Android POS

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Android POS market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Newland NPT, PAX Technology, New POS Technology, Verifone, Ingenico (Worldline), Shenzhen Xinguodu Technology, Wuhan Tianyu Information, BBPOS, Centerm, MoreFun Electronic Technology, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Android POS market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.
