Abstracts

The futon vacuum cleaners have various additional handy functions, which conventional cleaners don't have. Some futon cleaners have the vibrating pads to remove the dirt and dust from futons effectively or the ultraviolet sterilizer to eliminate dust mites on the surface of futons. Once those sterilized allergenic materials are collected in the cleaner's dustbin, the filter would prevent them escaping from the container. The futon cleaner with the ultraviolet sterilizer would have much the same effect as sunlight disinfection, so it would be quite helpful during the rainy season.
