The global Angle of Repose Tester market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The Angle of Repose Tester consists of a 100mm diameter circular test platform and a digital gauge that allows easy reading of powder heights up to 300mm from the clear gauge display. Simply divide this value by 50 to calculate the angle of repose. , the angle of repose is the angle (relative to the horizontal bottom surface) of the conical pile created when the granular material is dumped on a horizontal surface. It is related to the density, surface area and coefficient of friction of the material concerned
