The global Angle Shut-off Valve market size is expected to reach \$ 1011.4 million by 2029, rising at a market growth of 8.3% CAGR during the forecast period (2023-2029).

Angle Shut-off Valve are a common type of valve used to control the flow of fluids. They have many applications, including water supply, HVAC, petrochemical, pharmaceutical, food processing, and more. As technology advances, materials used in the manufacture of angle globe valves continue to evolve. The introduction of new materials aims to improve the valve's corrosion resistance, wear resistance and high temperature resistance. Some common valve materials include stainless steel, copper alloys, carbon steel and alloy steel. As industrial automation continues to advance, angle globe valves are becoming more automated and intelligent. These valves can be integrated with control systems for remote operation, timing control and troubleshooting. Intelligent angle globe valves can improve productivity, reduce energy consumption and minimise human error. Valve manufacturers and users are increasingly focusing on energy saving and environmental protection. Design more efficient angle globe valve can reduce energy consumption, reduce emissions, in line with the requirements of sustainable development. Valve sealing performance is critical to fluid control. Modern angle globe valves use more advanced sealing materials and design to ensure reliable sealing performance. Overall, the angle globe valve industry is moving toward greater efficiency, reliability, environmental friendliness and intelligence. These trends reflect the industry's ongoing quest for improved fluid control technology to suit the needs of different industries and applications.

An angle shut-off valve, also known as an angle valve or an angle stop valve, is a type of plumbing valve used to control the flow of water in residential and commercial plumbing systems. These valves are typically installed at water supply lines to individual

fixtures, such as sinks, toilets, and faucets. Angle shut-off valves allow users to turn the water supply on or off to a specific fixture without affecting the rest of the plumbing system.
