## Abstracts

According to our (Global Info Research) latest study, the global Angle Touch All-In-One Machine market size was valued at US\$ 577 million in 2025 and is forecast to a readjusted size of US\$ 869 million by 2032 with a CAGR of 6.2% during review period.

An angled touch all-in-one computer is an integrated device with an angled design that combines display and touch screen technology. It is usually used in interactive information display, advertising, or education and training. Its angled design facilitates intuitive and comfortable touch operations from different heights or angles, providing a better user experience. This device integrates a touch screen, a computer host, and a multimedia system. It is commonly found in shopping malls, exhibition halls, schools, and conference venues. It supports multi-touch, gesture recognition, and other functions, which improves the convenience of interaction and the effect of information display.

The angled touch screen all-in-one PC industry chain typically consists of upstream core hardware and basic components, midstream system integration and software platforms, and downstream industry applications and services: The upstream includes key components such as touch panels (capacitive/infrared/projected capacitive), displays (LCD/LED/OLED), processing chips (CPU/GPU/SoC), storage, and power modules; the midstream is centered around angled touch screen all-in-one PC manufacturers and system integrators, covering operating system customization, touch drivers, interactive software development, and integration of teaching/conference/commercial application platforms, while also providing firmware upgrades and operation and maintenance services; the downstream targets specific application scenarios, including education and training, smart office, commercial

display, public information services, and medical information interaction, realizing value through project sales, channel distribution, and after-sales service, presenting a collaborative development model of 'hardware foundation + software interaction + scenario application'.

In 2025, the average price of an angled touch screen all-in-one PC is projected to be US\$1200 per unit, with sales of 467.5 k units and a gross profit margin of approximately 39%.

The design of the angled touch all-in-one machine not only optimizes the user's interactive experience, but also makes information display more intuitive and operation more convenient through the ergonomic inclined structure, which is suitable for use at different heights and angles. This device is widely used in shopping malls, exhibition halls, education and corporate environments, which can improve the efficiency of information transmission, attract users' attention and provide an immersive interactive experience. With the continuous development of intelligent technology and multimedia applications, the angled touch all-in-one machine is expected to play a greater role in more fields and help popularize digital and intelligent information display.
