According to our (Global Info Research) latest study, the global Animal Experimental Model market size was valued at USD 528.9 million in 2022 and is forecast to a readjusted size of USD 666.1 million by 2029 with a CAGR of 3.3% during review period.

An ideal model for learning the skills required for humane and ethical handling and procedural competence without the use of live animals, the Anatomical Training Manikin is a specially designed training aid to provide the skills required for animal handling and procedural competence without the use of live animals live animals.

According to data from the company's 'Pet Products Research Center', the global pet industry will reach US\$246 billion in 2022, a year-on-year increase of 11.3%. The United States has the highest pet penetration rate and is also the largest pet consumer market. According to data from the American Pet Products Association (APPA), 66% of American households own pets, and the total industry sales are approximately US\$136.8 billion, an increase of 10.8% from 2021. . IVH, the German Pet Products Industry Association, stated that the number of pets in Germany will be as high as 33.4 million in 2022, with a total turnover of nearly 6.5 billion euros. The '2023 China Pet Industry Trend Insights White Paper' released by JD.com shows that China's pet industry is showing a trend of 'red ocean near, blue ocean far away'. In 2023, the number of pet-raising households in China will exceed 100 million, and the market size will reach 129.6 billion yuan. Specifically, the market sizes of the four major physical pet products are all increasing year by year: pet supplies account for 45%, pet staple food accounts for nearly 35%, pet snacks account for 12%, and pet medicine and health care account for 9%. Pet medical care is the pet industry's economic industry second only to

pet food. In the UK, annual spending on veterinary and other pet services has increased from ?2.6 billion in 2015 to ?4 billion in 2021, a 54% increase in just six years. Data from Vetnosis shows that the value of the global animal health industry increased by 12% in 2021, reaching \$38.3 billion.
