## Abstracts

The global Animal Feed Grade Sodium Bicarbonate market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Animal feed grade sodium bicarbonate is an essential component in animal nutrition, primarily used to regulate pH levels in the digestive systems of livestock and poultry. It plays a crucial role in preventing acidosis and ensuring efficient digestion. The global demand for meat, including beef, poultry, and pork, continues to rise, driving the need for efficient animal nutrition. Sodium bicarbonate is used to support healthy digestion in livestock, which, in turn, enhances meat production. The United States and Canada have significant livestock and poultry industries, driving the demand for feed grade sodium bicarbonate. European countries, particularly those with robust dairy and livestock sectors, are important consumers of animal feed grade sodium bicarbonate. Rapid urbanization and changing dietary habits in Asia have led to increased demand for meat and dairy products, impacting the use of sodium bicarbonate in animal nutrition. The animal feed grade sodium bicarbonate market is expected to continue growing, driven by the global demand for meat, dairy, and poultry products. As consumers become more health-conscious, the focus on animal health and well-being is likely to intensify, further fueling the need for effective nutritional solutions. Additionally, advancements in precision animal nutrition and sustainable farming practices are expected to influence the market's future direction.

Animal feed grade sodium bicarbonate is a specific grade of sodium bicarbonate, commonly known as baking soda, that is formulated and manufactured for use as a dietary supplement and feed additive in animal nutrition. It is utilized in animal feed primarily to regulate and support the digestive processes in various livestock and poultry

species.
