Abstracts

Organic trace minerals have vital role in maintaining animal health. The rate of absorbing the food increases with the presence of trace minerals in the feed, and they improve the nutrient content in animal feed. Growing occurrences of disease outbreaks, such as avian influenza (AI), in poultry and turkey have increased the demand for these minerals. Bioavailability is another factor that differentiates organic and inorganic trace minerals in animal feed. Poultry was the largest consumer of organic trace minerals in animal feed in 2016. The demand for broilers, chickens, and turkeys has witnessed a steady increase, particularly in countries with growing food industries such as China, India, and Brazil, which has played a key role in growing animal feed consumption in these countries.

Scope of the Report:

This report focuses on the Animal Feed Organic Trace Minerals in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Asia Pacific dominated the organic trace minerals market in 2016. This region was the largest manufacturer and consumer of feed with China and India accounting for a majority of the share. Favorable demographics, subsidized tax regime in animal husbandry, and improving feed quality were the major driving factors of this market in Asia Pacific.

Europe accounted for 27.7% of the market share in 2016. This region was driven by the growing demand from major animal feed consuming countries including Spain, Germany, the Netherlands, and France. State-of-the-art infrastructure and favorable

climatic conditions have helped the region grow in the poultry and pork sectors, consequently boosting the demand for organic trace minerals.

The worldwide market for Animal Feed Organic Trace Minerals is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
