### Scope of the Report:

This report studies the Animal Produce market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Animal Produce market by product type and applications/end industries.

Companies in the meat processing industry are turning to robotics to maximize production efficiency. Robotic systems automate deboning, cutting, butchering, and monitoring processes in meat production. This decreases cycle times and increases throughput. Automation helps to improve plant conditions, reduce contamination, and makes meat processing safer for workers as well as consumers. Plants with fixed automation systems can increase yields by at least 2-3% over workers.
