Animal Protection Fence is a protective barrier system installed along infrastructure or land boundaries to prevent wildlife or livestock from entering hazardous or restricted areas such as highways, railways, airports, farms, and industrial sites. It typically consists of high-tensile wire mesh panels, posts, tension wires, and anchoring components, sometimes combined with underground skirts or overhang structures to stop burrowing or climbing animals. Upstream, it relies on galvanized or coated steel wire, posts, fasteners, and anti-corrosion coatings; midstream manufacturers fabricate fencing panels and installation hardware; downstream, it is used by transport authorities, agricultural operations, and facility operators to improve safety, reduce animal-vehicle collisions, and protect property and wildlife.
