According to our (Global Info Research) latest study, the global Anionic Surfactants market size was valued at USD 15040 million in 2023 and is forecast to a readjusted size of USD 17630 million by 2030 with a CAGR of 2.3% during review period.

Anionic Surfactant is a surface active substance that contains wash active and degreasing abilities on the surfaces of metals. It lowers the surface tension of water and thus removes the dirt from the surfaces of the metals. Anionic Surfactant is one of the classifications of surfactants. In anionic surfactant, the hydrophilic part consists of negatively charged group.

Asia Pacific was the largest market for anionic surfactants in 2017, globally. High consumption potential, growing production capacities, competitive manufacturing costs, and high economic growth are the major driving forces for the market in the region. This dominance of Asia Pacific is mainly due to the increasing population and improving lifestyles at each financial stratum.
