Abstracts

The global Anisotropic NdFeB Bonded Magnet market size is expected to reach \$ 1456 million by 2032, rising at a market growth of 7.4% CAGR during the forecast period (2026-2032).

In 2025, global anisotropic SmFeN bonded magnet production reached approximately 6112 tons, the average price is 140 usd/kg. Anisotropic SmFeN bonded magnets refer to bonded permanent magnets made by mixing Sm?Fe??N? magnetic powder, which has been oriented by a magnetic field, with a polymer and forming it under the action of an external magnetic field. This allows the magnetic powder grains to be preferentially aligned along a specific direction, thereby obtaining bonded permanent magnets with significantly higher magnetic performance than the isotropic version in that direction. The gross profit margin of anisotropic SmFeN bonded magnets is around 28%.

This report studies the global Anisotropic NdFeB Bonded Magnet production, demand, key manufacturers, and key regions.
