## Abstracts

The global Antenna Measurement System market size is expected to reach \$ 1871.3 million by 2029, rising at a market growth of 22.4% CAGR during the forecast period (2023-2029).

In the global market, the core manufacturers of Antenna Measurement System are Continental, Visteon Corporation, Valeo, BOSCH, ect. The top five companies within this industry account for nearly 50% of the market share. North America, Europe, China and Japan are the main production areas of the product, of which North America and China accounted for about 30% of the global market share. The product can be classified as radar-based one or camera-based based one on the principle of operation and is used in commercial vehicles and passenger cars.

With highly automated drive levels, not only are exterior assistance systems being enhanced, the interior of vehicles is also being reshaped to provide a holistic in-vehicle experience using in-cabin sensing technology. The Interior Monitoring System (IMS), which is comprised on Driver Monitoring System (DMS) and Occupant Monitoring Systems (OMS), use cameras and radars to capture important first-order biometric features of drivers and occupants, such as gaze, head position and pupil diameter, among many other key facial features. It detects minute fluctuations in pupil diameter and calculates brain activity level, especially high cognitive load.
