Anticancer drug, also called antineoplastic drug, any drug that is effective in the treatment of malignant, or cancerous, disease. There are several major classes of anticancer drugs; these include alkylating agents, antimetabolites, natural products, and hormones.

Scope of the Report:

This report focuses on the Anti-Cancer Drug in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. China and India are expected to offer good opportunities an account of improvement in healthcare infrastructure. In Africa, industry is expected to drive at lower rate on account of lack of healthcare infrastructure, expensive medical services and lack of consumer awareness.

Central & South America is expected to drive at stable rates on account of costly medicines coupled with minimal awareness initiatives by regional government. Global market is also expected to have legal conflicts arising on account of patents which in turn are expected to negatively impact overall industry.

The worldwide market for Anti-Cancer Drug is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
