Scope of the Report:

This report studies the Anti-Counterfeit Packaging Technologies market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Anti-Counterfeit Packaging Technologies market by product type and applications/end industries.

Amid increasingly stringent security regulations and an alarmingly high number of fake products on the market, anti-counterfeiting technologies are the latest trend to take the packaging industry by storm.

Currently, the industry concentration of Anti-counterfeit Packaging is relatively low. Major manufacturers of anti-counterfeiting packaging product are mainly in US, Europe, Japan and China.

All manufacturers in the world are committed to the improvement of product quality. Currently, in Anti-counterfeit Packaging industry, the USA and EU manufacturers occupy near 4/5 of the market, while Chinese products domain the domestic market, due to the immature technologies.

Manufacturers of consumer goods have started implementing traceability systems that provide a trail of information of each item in a supply chain. These systems ensure

product safety and efficiency. The producers can identify and locate potentially faulty items that could be hazardous to customers and remove them. The companies are implementing vision systems, 2-D barcodes, and image-based ID readers in product traceability systems. Data Matrix is very popular and adopted as a standard in several applications, as it allows the storage of more information such as product ID, manufacturer, lot number, and expiry.

Although sales of Anti-counterfeit Packaging bring a lot of opportunities, the study group recommends the new entrants who just have money but without technical advantage, raw materials advantage and downstream support, do not enter into the Anti-counterfeit Packaging field hastily.

The global Anti-Counterfeit Packaging Technologies market is valued at 51800 million USD in 2017 and is expected to reach 104800 million USD by the end of 2023, growing at a CAGR of 12.5% between 2017 and 2023.
