Abstracts

The global Anti-IL-23 p19 Monoclonal Antibodies market size is expected to reach \$ 47898 million by 2032, rising at a market growth of 8.3% CAGR during the forecast period (2026-2032).

Anti-IL-23 p19 monoclonal antibodies are recombinant therapeutic biologics designed to selectively bind the p19 subunit of interleukin 23 and treat immune-mediated inflammatory diseases. The product scope mainly covers humanized or fully human IgG monoclonal antibody injections, including prefilled syringes, autoinjectors, subcutaneous formulations and intravenous induction formulations used in selected indications. Core manufacturing processes include antibody discovery and optimization, mammalian cell expression, cell culture, protein A purification, viral inactivation, ultrafiltration and concentration, aseptic filling, cold-chain release testing and biologics quality control. Key specifications include target-binding affinity, p19 selectivity, serum half-life, dosing interval, immunogenicity, formulation stability, purity, aggregate level, potency and batch-to-batch consistency. The main therapeutic function is to inhibit IL-23-mediated activation of the Th17 inflammatory pathway and reduce downstream cytokine activity, thereby improving chronic inflammatory diseases such as moderate to severe plaque psoriasis, psoriatic arthritis, Crohn's disease and ulcerative colitis. The industry is positioned within specialty biologics and autoimmune therapeutics, with demand driven by long-term treatment, expanded indications, improved dosing convenience and substitution from older immunology therapies. In 2025, mature commercialized anti-IL-23 p19 monoclonal antibody products generally achieved gross margins of about 80% to 90%.

Anti-IL-23 p19 monoclonal antibodies represent one of the most commercially established segments within specialty immunology biologics. The market is not

characterized by a large number of manufacturers, but by a small group of approved therapies that have built strong positions through clear target selectivity, durable efficacy, convenient dosing and continuous indication expansion. The upstream chain includes cell line development, culture media, single-use bioreactors, purification resins, sterile filling materials and cold-chain systems. The midstream consists of antibody discovery, clinical development, regulatory registration, large-scale biologics manufacturing and quality release. The downstream market is concentrated in dermatology, rheumatology and gastroenterology, where chronic disease management and long treatment duration support resilient demand. Competition is highly concentrated, but the basis of competition is changing. Initial adoption was largely driven by plaque psoriasis, while future growth is increasingly linked to inflammatory bowel disease, psoriatic arthritis and broader immune-mediated conditions. New product launches and indication expansion remain the main commercial catalysts, but differentiation must be supported by sustained efficacy, safety, dosing convenience and real-world outcomes. Licensing, co-development and regional commercialization agreements are expected to remain active, particularly around late-stage pipelines and next-generation antibody formats. These transactions can improve development efficiency and accelerate geographic expansion, but they also make revenue attribution and market sizing more complex. The policy environment is broadly supportive of innovative biologics, especially where therapies address chronic inflammatory diseases with high unmet needs. At the same time, payer pressure, health technology assessment, price negotiation, biosimilar risk and patent-cycle dynamics will gradually moderate long-term growth. The industry remains a growth market, but it is moving from a rapid expansion phase toward a more mature phase driven by product differentiation and lifecycle management. Products with longer half-life, fewer injections, broader indication coverage and reliable manufacturing quality are likely to gain share, while late entrants with limited clinical or pricing advantages may face increasing commercialization pressure.

This report studies the global Anti-IL-23 p19 Monoclonal Antibodies production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Anti-IL-23 p19 Monoclonal Antibodies and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Anti-IL-23 p19 Monoclonal Antibodies that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Anti-IL-23 p19 Monoclonal Antibodies total production and demand, 2021-2032, (Unit)

Global Anti-IL-23 p19 Monoclonal Antibodies total production value, 2021-2032, (USD Million)

Global Anti-IL-23 p19 Monoclonal Antibodies production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (Unit), (based on production site)

Global Anti-IL-23 p19 Monoclonal Antibodies consumption by region & country, CAGR, 2021-2032 & (Unit)

U.S. VS China: Anti-IL-23 p19 Monoclonal Antibodies domestic production, consumption, key domestic manufacturers and share

Global Anti-IL-23 p19 Monoclonal Antibodies production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (Unit)

Global Anti-IL-23 p19 Monoclonal Antibodies production by Indication, production, value, CAGR, 2021-2032, (USD Million) & (Unit)

Global Anti-IL-23 p19 Monoclonal Antibodies production by Application, production, value, CAGR, 2021-2032, (USD Million) & (Unit)

This report profiles key players in the global Anti-IL-23 p19 Monoclonal Antibodies market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include AbbVie Inc., Johnson & Johnson, Eli Lilly and Company, Sun Pharmaceutical Industries Limited, Innovent Biologics, Inc., Hansoh Pharmaceutical Group Company Limited, SUN Pharmaceuticals Industries Europe B.V., Industrias Farmac?uticas Almirall, S.A., etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Anti-IL-23 p19 Monoclonal Antibodies market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (Unit) and average price (US\$/Unit) by manufacturer, by Indication, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

7 MARKET ANALYSIS BY ROUTE OF ADMINISTRATION

7.1 World Anti-IL-23 p19 Monoclonal Antibodies Market Size Overview by Route of
Administration: 2021 VS 2025 VS 2032

7.2 Segment Introduction by Route of Administration

7.2.1 Subcutaneous Injection

7.2.2 Intravenous Induction plus Subcutaneous Maintenance

7.2.3 Intravenous Injection

7.2.4 Others

7.3 Market Segment by Route of Administration

7.3.1 World Anti-IL-23 p19 Monoclonal Antibodies Production by Route of Administration (2021-2032)

7.3.2 World Anti-IL-23 p19 Monoclonal Antibodies Production Value by Route of Administration (2021-2032)

7.3.3 World Anti-IL-23 p19 Monoclonal Antibodies Average Price by Route of Administration (2021-2032)

8 MARKET ANALYSIS BY APPLICATION

8.1 World Anti-IL-23 p19 Monoclonal Antibodies Market Size Overview by Application: 2021 VS 2025 VS 2032

8.2 Segment Introduction by Application

8.2.1 Hospitals

8.2.2 Specialist Clinics

8.2.3 Infusion Centers

8.2.4 Specialty Pharmacies

8.2.5 Retail and DTP Pharmacies

8.2.6 Others

8.3 Market Segment by Application

8.3.1 World Anti-IL-23 p19 Monoclonal Antibodies Production by Application (2021-2032)

8.3.2 World Anti-IL-23 p19 Monoclonal Antibodies Production Value by Application (2021-2032)
