Anti-Mite Masterbatch is a type of additive used in the manufacturing of plastic products to prevent or reduce the growth of mites. Mites are tiny arachnids that can cause various problems, including allergies and damage to materials. The masterbatch is typically added to the plastic resin during the production process, and it releases substances that are toxic or repellent to mites. This helps to create mite-resistant plastic products, such as bedding, furniture, and carpets, that are less likely to harbor mites and cause related issues.
