Anti-mold silicone sealant is a sealing material that combines the excellent performance of silicone materials with anti-mold functions. It is mainly composed of silicone polymers, fillers, cross-linking agents, catalysts, and anti-mold agents, and has excellent elasticity, weather resistance, water resistance, and chemical resistance. After curing, this sealant forms a strong and soft barrier that can effectively fill and seal various gaps to prevent the penetration of moisture, air, and microorganisms. At the same time, the anti-mold agent contained in it can continuously release antibacterial active ingredients, inhibit the growth of microorganisms such as mold and bacteria, and keep the sealed parts dry and hygienic. Anti-mold silicone sealant is widely used in humid environments such as kitchens, bathrooms, and places that require high hygiene standards. It can not only improve the sealing and durability of buildings, but also effectively prevent mold growth and protect people's health and living environment.
