### Scope of the Report:

This report focuses on the Anti-Reflective Glass in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Anti-reflective glass is a type of glass, which is designed to reduce the amount of surface reflection seen from the face of the glass.

The visual reflectance in the normal clear glazing can be diminished, therefore the glass can exhibit a near invisible finish for glass installation

Anti-reflective glass is made from low iron glass which is dipped in multiple solutions of metallic oxides. These solutions create a coating on all the faces of the glass, thereby preventing visual reflectance.

The worldwide market for Anti-Reflective Glass is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
