Abstracts

According to our (Global Info Research) latest study, the global Anti-static PMMA Sheet market size was valued at US\$ 1080 million in 2025 and is forecast to a readjusted size of US\$ 1786 million by 2032 with a CAGR of 7.4% during review period.

In 2025, global production of anti-static PMMA sheets reached approximately 0.18 million tons, based on an average market price of around US\$ 5,800 per ton. Industry gross profit margins generally ranged from 30% to 48%, reflecting value added from surface treatment technology, static dissipation performance, and optical quality control. Global production capacity in 2025 was estimated at about 0.23 million tons, indicating adequate supply capability to support demand from electronics and cleanroom applications.

Anti-static PMMA sheets are acrylic sheets engineered to dissipate static electricity while maintaining high transparency and mechanical stability. They are designed to reduce electrostatic discharge risks and particle attraction, making them suitable for sensitive environments requiring both visibility and static control.

The industrial chain includes upstream PMMA resins, anti-static additives, coatings, and extrusion or casting equipment. The midstream focuses on sheet forming, surface treatment, static performance calibration, and cutting. Downstream applications mainly involve electronics manufacturing, cleanrooms, display protection, medical equipment, and precision industrial enclosures.

The anti-static PMMA sheet market is developing steadily as demand increases for electrostatic control materials in electronics and precision manufacturing. Growth is

driven by semiconductor production, expansion of cleanroom facilities, and higher standards for contamination and ESD prevention. Anti-static PMMA sheets offer a combination of optical clarity, mechanical strength, and controlled surface resistivity, making them suitable for protective covers and enclosures. Manufacturers are focusing on improving long-term anti-static stability, scratch resistance, and coating durability. During 2026-2032, supported by electronics industry growth, clean manufacturing investment, and rising quality requirements, the anti-static PMMA sheet market is expected to maintain stable global growth.
