Abstracts

Anti-static zippers are specially designed zippers that are used to reduce or prevent the generation or accumulation of static electricity during the zipping process. This kind of zipper is usually made of materials with anti-static properties, or it is coated with a special anti-static coating on the surface to provide anti-static functions. The main purpose of anti-static zippers is to prevent the generation or accumulation of static electricity and reduce the possible interference or damage caused by static electricity to the surrounding environment or devices. They are usually used in situations where static control is required, such as electronic equipment, chemical laboratories, clean room environments, etc.

According to our (Global Info Research) latest study, the global Anti-Static Zipper market size was valued at US\$ 723 million in 2023 and is forecast to a readjusted size of USD 1093 million by 2030 with a CAGR of 6.1% during review period.

With the rapid development of the electronics industry, especially the continuous expansion of smartphones, tablets, wearable devices and other fields, the demand for anti-static zippers continues to grow. This is because anti-static zippers can effectively reduce the damage caused by static electricity to electronic equipment, ensuring the normal operation of the equipment and the safety of users. In addition, anti-static zippers are not only used in the electronics industry, but also gradually expanded to medical, chemical, aerospace and other fields. In the medical field, anti-static zippers can reduce the impact of static electricity on patients and medical equipment during surgery; in the chemical industry, it can prevent fire or explosion accidents caused by static electricity; in the aerospace field, anti-static zippers play a key role to ensure the safe and stable operation of the aircraft. Therefore, the anti-static zipper market is

currently experiencing growth in demand, expansion of application areas, and intensified market competition. In the future, the anti-static zipper market will continue to maintain rapid development.
