Anti Vibration (AV) Rubber Pads are specialized rubber components designed to reduce or eliminate the transmission of vibrations and noise from machinery, equipment, or structures. These pads are made from high-quality rubber materials that absorb and dissipate vibrational energy, preventing it from spreading to surrounding areas. They are commonly used in industrial settings to support heavy machinery, HVAC systems, and other equipment that generates vibrations, thereby protecting both the equipment and the environment from potential damage and disturbances. AV Rubber Pads also help in enhancing the longevity and efficiency of the machinery by minimizing wear and tear caused by excessive vibrations.
