## Abstracts

The global Antibody-radionuclide Conjugates market size is expected to reach \$ 3159.3 million by 2029, rising at a market growth of 16.7% CAGR during the forecast period (2023-2029).

The Antibody-radionuclide Conjugates Market is driven by the increasing interest in targeted cancer therapy and the potential of combining monoclonal antibodies with radioactive isotopes to deliver precise treatment. Antibody-radionuclide conjugates offer a highly focused approach to treating cancer by delivering radiation directly to tumor cells, minimizing damage to healthy tissue. As the understanding of cancer biology and immunotherapy advances, and personalized treatment options gain prominence, the demand for these conjugates continues to grow. Innovations in conjugation techniques, radiolabeling methods, and the expansion of the oncology pipeline further contribute to market expansion. However, a significant challenge for this market is the need to address complex drug development processes, optimize safety and efficacy, and navigate regulatory standards while ensuring affordability and accessibility for patients. Overcoming production challenges, minimizing off-target effects, and managing development costs are ongoing hurdles. Additionally, the market faces competition from other cancer therapies and the need for continuous research and development to enhance the efficiency and precision of antibody-radionuclide conjugates. Striking a balance between providing safe, effective, and accessible targeted cancer treatments while addressing scientific and regulatory challenges is essential for the continued growth of the Antibody-radionuclide Conjugates Market.

Antibody-radionuclide Conjugates is a type of targeted cancer therapy that combines the specificity of monoclonal antibodies with the destructive power of radiation. The treatment involves attaching radioactive isotopes to monoclonal antibodies, which are

specialized proteins that can recognize and bind to specific antigens found on the surface of cancer cells.
