Antifog Films and Sheets are polymeric transparent layers, either flexible films or rigid sheets, that are manufactured with anti-fog functionality through either surface coating modification or internal additive migration technology. In 2025, global antifog films and sheets production reached approximately 1,256K ton, with an average global market price of around USD 3,200 per ton. A factory gross profit of USD 960 per ton with 30% gross margin. A single line full machine capacity production is around 68K ton per line per year. The upstream is dependent on polymer resin, surfactants and coating materials. The downstream demand is concentrated in food packaging, agriculture and healthcare and medical. anti fog lidding film for microwaveable trays maintains clarity during and after heating; consumers can inspect meal without opening packaging and enhances perceived quality. India market is driven by expanding food sector and strong domestic product base. China market is driven by packaged food demand.
