Abstracts

The global Antimicrobial Silver Wound Dressing market size is expected to reach \$ 1041.8 million by 2029, rising at a market growth of 3.3% CAGR during the forecast period (2023-2029).

Global key players of antimicrobial silver wound dressing include ConvaTec, 3M, Smith & Nephew, etc. The top three players hold a share about 54%. North America is the largest market, has a share about 39%, followed by Europe and Asia-Pacific, with share 38% and 18%, separately.

Silver has been used as a topical antimicrobial agent for hundreds of years in wound care and there is consensus that topical silver treatment in combination with good wound bed preparation can help resolve wound infection. Furthermore, silver dressings can be used as a barrier to microorganisms in wounds at risk of infection or re-infection, e.g. burns, surgical wounds, pressure ulcers near the anus, or wounds in patients who are immunocompromised, have poor circulation, or unstable diabetes. Antimicrobial Silver Wound Dressings are a relatively new family of advanced wound care dressings for the treatment of infected wounds. A silver dressing is a wound dressing impregnated with ionic silver. The ionic silver is responsible for the anti-microbial activity against infection caused by bacteria.

This report studies the global Antimicrobial Silver Wound Dressing production, demand, key manufacturers, and key regions.
