Abstracts

Antipsychotics, also known as neuroleptics or major tranquilizers, are a class of medication primarily used to manage psychosis (including delusions, hallucinations, paranoia or disordered thought), principally in schizophrenia and bipolar disorder.

Scope of the Report:

This report focuses on the Antipsychotic Drugs in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

During 2016, the second-generation antipsychotic drugs segment dominated the antipsychotic drugs market with the highest market shares. These drugs are preferred over first-generation antipsychotic drugs because they involve lesser side effects and are highly efficient in the treatment of various mental disorders. The adoption of these drugs is high because they reduce EPSE, controls symptoms, and maintains the normal levels of prolactin. This segment yields a high prescription value that in turn, will drive growth in the segment during the forecasted period.

The worldwide market for Antipsychotic Drugs is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
