Antipyretic Chinese Traditional Medicine refers to a category of traditional Chinese medicinal materials and preparations guided by traditional Chinese medicine theory, which are mostly cold in nature and bitter in taste, and mainly function to clear away internal heat, reduce fever and detoxify through ingredients such as flavonoids and alkaloids. It is used to treat various fever symptoms caused by exogenous pathogens, internal heat accumulation or yin deficiency, and can be divided into types such as clearing heat and purging fire, clearing heat and detoxifying, and clearing heat and cooling blood. Common varieties include honeysuckle, chrysanthemum, coptis, and preparations such as Yin Qiao San and Huang Lian Jie Du Tang.
