According to our (Global Info Research) latest study, the global Antiscalant market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

Antiscalant is a chemical injected into the feed water before the water is entered into the system. The chemical delays the reaction time between the bicarbonate and calcium magnesium, thereby controlling the formation of scales. Carbonates, phosphates and sulfates are the major products used in various water treatment applications on account their superior antiscalant properties.

In Middle East, Antiscalant key players include BASF, Ashland, BWA Water Additives, NALCO, etc. Global top four manufacturers hold a share nearly 55%.

Saudi Arabia is the largest market, with a share about 50%, followed by United Arab Emirates, and Iran, both have a share about 35 percent.

In terms of product, Phosphonates is the largest segment, with a share over 45%. And in terms of application, the largest application is Oil and Gas, followed by Desalination, Power and Construction, Desalination, etc.
