Antistatic floor paint is a two-component paint made of high-grade epoxy resin, high-efficiency conductive material, high-grade pigment additive and epoxy special curing agent in a certain proportion. Electrostatic floor paint can eliminate and prevent the generation of static electricity and electromagnetic waves, and avoid static sparks and electromagnetic interference and damage. The surface resistance of the paint film is usually controlled between 10⁶-10⁹ ohms, which helps to prevent static charge leakage and eliminate the hazards of static electricity accumulation and electromagnetic interference.
