## Abstracts

An antistatic gun is a machine that neutralizes the static charge of an object. It neutralizes the static charge of an object by ionizing the air and discharging it along with the air toward the object. It is also called a static eliminator gun because its role is similar to that of an ionizer gun type. Since high-pressure air is released onto the object, it is possible to remove dust attached to the object as well. They are used in painting and manufacturing to remove dust caused by static electricity.
