Abstracts

The global Application Security Assessment Services market size is expected to reach $ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Application security assessment is the process of testing applications to find threats and determining the measures to put in place to defend against them. Through the assessment process, organizations can evaluate the current security posture of their applications and determine the next steps for further protecting their software from future exploits. Most organizations conduct application security assessments on a regular basis to ensure their security measures are up-to-date and effective.

This report studies the global Application Security Assessment Services demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Application Security Assessment Services, and provides market size (US$ million) and Year-over-Year (YoY) growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Application Security Assessment Services that contribute to its increasing demand across many markets.
