The global ARA Raw Material for Milk Powder market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

On March 22, 2023, China will implement a new national standard for milk powder. The new national standard for milk powder in China has adjusted the composition requirements of infant formula milk powder, including the adjustment of protein, fat, carbohydrates, trace elements, and optional ingredients. Among the optional ingredients, choline is adjusted as an essential ingredient in the 1/2 section, and the upper and lower limits of DHA and ARA are increased. As the population problem continues to worsen, health products for infants and young children are expected to receive more attention at the policy level.
