## Abstracts

Aramid is a super engineering plastic with excellent hardness and heat resistance and Toray's aramid film mictron® is the only commercially available aramid film in the world. Based on this technology, the company employed its proprietary polymer design and membrane forming technology and developed the colorless and transparent aramid film with high hardness and heat resistance.

Further, it treated the surface of the clear aramid film with specially designed process to realize ultra-high hardness of 9H and bending resistance that can withstand bending of more than 1 million times at a bending radius of 1 mm. Using this film as cover window is expected to realize thin and highly designable flexible display with scratch-resistance as good as glass.

According to our (Global Info Research) latest study, the global Aramid Film market size was valued at US\$ million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of %during review period.
